## BIOCOMPATIBILITY RESULTS FOR KINESIOLOGY

**Patient.....Date.....**

To the Practitioner:

If the patient is undergoing a standard filling we must have TWO items tested for categories 1 through 6.

Our preferred materials are marked with brackets and are the strongest and most biocompatible products available today. If, however these products produce a reaction in the patient, please test until two non-reacting materials are found.

For more complicated procedures please test all remaining items in categories 7 through 11.

### COMPULSORY CATEGORIES

#### 1. Lining Material

Ionoseal (1<sup>st</sup> pref)  
Fuji 9  
Vitrebond

#### 2. Bonds

G-Bond (1<sup>st</sup> pref)  
SE Bond (2<sup>nd</sup> pref)  
Admira Bond (3<sup>rd</sup> pref)

#### 3. Flowable Composite

Admira Flow (1<sup>st</sup> pref)  
Diamond link(2<sup>nd</sup>pref)

#### 4. Composite

Admira (1<sup>st</sup> pref)  
Diamond Crown (2<sup>nd</sup> pref)  
Grandio  
Gradia – Cosmetic

#### 5. Local Anaesthetic

Septanest (1<sup>st</sup> pref)  
Scandonest 3% Plain (2<sup>nd</sup> pref)  
Citanest (3<sup>rd</sup> pref)  
Lignospan Special

#### 6. Temp Fillings

Dyract (1<sup>st</sup> pref)  
Cavit G (2<sup>nd</sup> pref)  
IRM (3<sup>rd</sup> pref)
