

BIOCOMPATIBILITY RESULTS FOR KINESIOLOGY

Patient.....**Date**.....

To the Practitioner:

If the patient is undergoing a standard filling we must have TWO items tested for categories 1 through 6.

Our preferred materials are marked with brackets and are the strongest and most biocompatible products available today. If, however these products produce a reaction in the patient, please test until two non-reacting materials are found.

For more complicated procedures please test all remaining items in categories 7 through 11.

COMPULSORY CATEGORIES

1. Lining Material

Ionoseal (1st pref)
Fuji 9
Vitrebond

2. Bonds

Admira Bond (1st pref)
SE Bond (2nd pref)

3. Flowable Composite

Admira Flow (1st pref)
Diamond link(2ndpref)

4. Composite

Admira (1st pref)
Diamond Crown (2nd pref)
Diamond Lite (3rd pref)
