

Oral Surgery Informed Consent

I understand that there are certain inherent risks in any oral and maxillofacial surgery procedure or treatment. The risks include but are not limited to, the risk of infection, bleeding, and scarring. Injury to nerves may occur causing numbness and/or loss of function both of which may be permanent. In addition, I understand that the treatment or surgery may cause damage to the area surrounding the site of the surgery such as breakage of a filling, tooth or jaw, or soft tissue injury. A persistent opening of one or more sinuses or injury to the temporomandibular joint (jaw joint).
